WEATHER OF CONCERN

NORTHERN CALIFORNIA

- High pressure builds over central California for the weekend resulting in dry and hot conditions. Most high temperatures across the San Joaquin Valley will reach the low 100s. It will also be hot along the Sierra foothills and coastal range, where fire danger remains high.
- A Fire Weather Watch has been issued for portions of Modoc County for strong, gusty winds with low relative humidity.

SOUTHERN CALIFORNIA

- Near to above normal temperatures and onshore flow will continue through this weekend and into next week, as high pressure continues to move west. A drying trend will last through the weekend. A return to active afternoon storms will begin on Tuesday.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

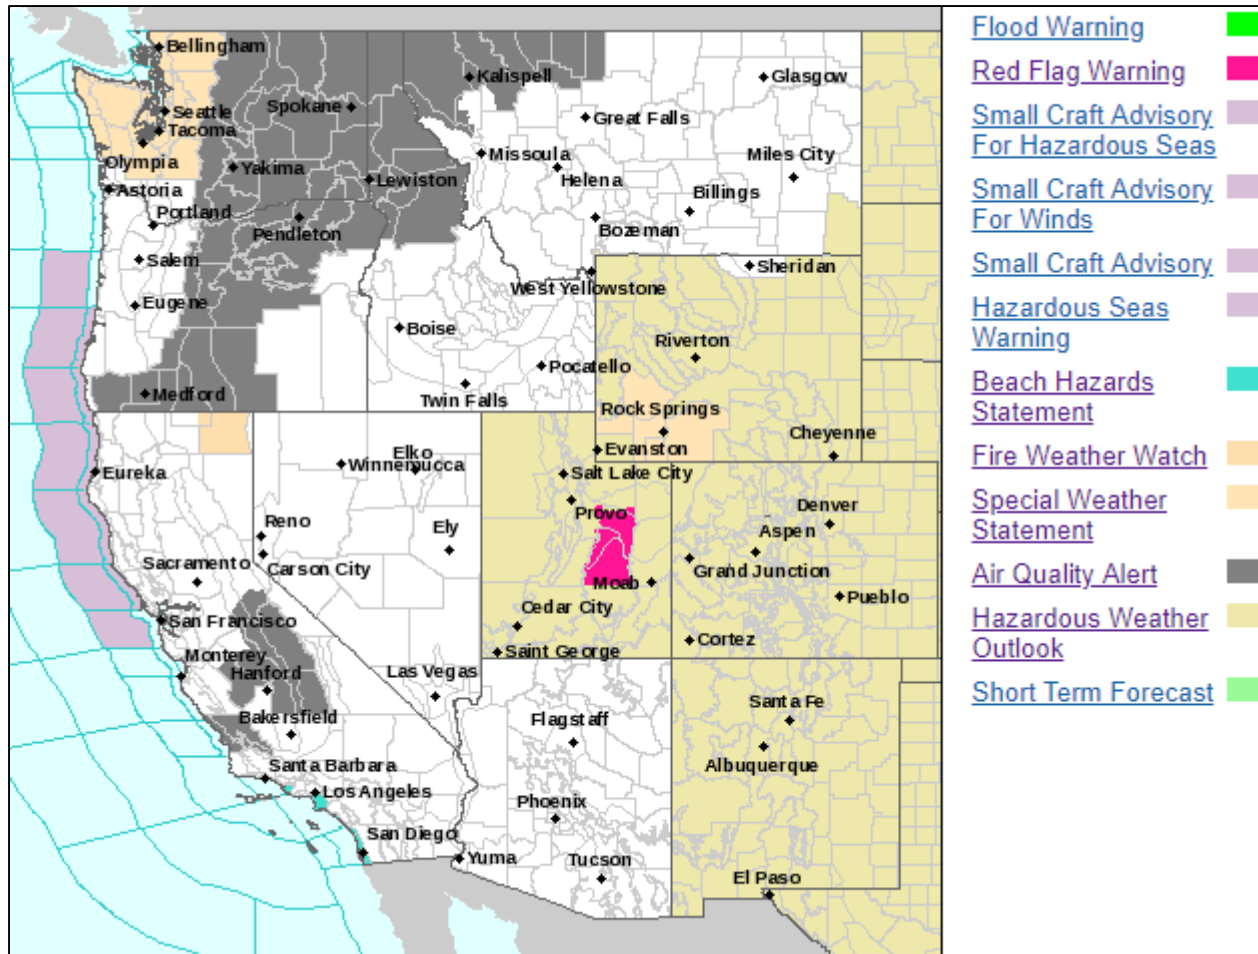

Hot and dry weather is expected over the weekend as high pressure strengthens. Poor overnight relative humidity recovery for the foothill thermal belts and upper slopes with increasing ridge top winds is forecast. Temperatures and humidity moderate slightly early next week as a weak trough returns to the West Coast.

SOUTHERN CALIFORNIA

High pressure aloft will peak today through Sunday. Temperatures will be a few degrees above normal, with humidities staying above 20 percent except briefly down to 10 to 15 percent in the interior sections each afternoon. The ridge will weaken a little on Monday with northwest flow turning more southwesterly, which may bring some cooling. There is some uncertainty for the middle to end of next week, with the more likely scenario being warming and drying conditions as the ridge re-builds, with gusty northwest flow forming once again.
